

Introducing the CreNova DVB Hybrid AOSP Box

CreNova is pleased to present its latest innovation in Android set-top box technology: the DVB Hybrid AOSP Box.

Advanced Broadcasting Standards:

This advanced platform supports a wide range of broadcasting standards, including DVB-S2, DVB-C, DVB-T2, ISDB-T, ATSC, and IPTV Multicast, as well as OTT services.

Seamless CAS Integration:

With seamless integration of major Conditional Access Systems (CAS), the DVB Hybrid AOSP Box allows Pay-TV service providers to deliver a versatile and secure entertainment experience to their subscribers.

▶ Key Features

Versatile Compatibility

CreNova's platform supports a wide range of broadcast standards, including DVB-x, ISDB-T, ATSC, Multicast, and OTT Hybrid.

This ensures compatibility with regional broadcast technologies and allows providers to cater to diverse markets.

Robust Security

The platform is integrated with the highest security standards for Crypto Guard, ensuring content protection and regulatory compliance.

This enables Pay-TV service providers to securely deliver premium content to their subscribers.

"Ready-to-Launch" Platforms

CreNova's solution enables quick and easy market entry without time-consuming certifications or integrations.

This allows Pay-TV service providers to focus on growth and expansion, accelerating their path to success.

Middleware Flexibility

The platform offers a range of middleware options, with streamlined SDK porting to any APK, ensuring seamless compatibility with your preferred solutions. This flexibility allows providers to tailor the platform to meet their specific requirements and integrate seamlessly with existing systems.

Rapid Time-to-Market

CreNova's ready-to-launch platform is designed to streamline the deployment process, enabling Pay-TV service providers to introduce new services and products with minimal delay. With off-the-shelf features that reduce development and integration time, providers can quickly adapt to changing market demands and stay ahead of the competition.

We Create Your Innovation.

CreNova is a global leader in providing Pay-TV content protection solutions, including Conditional Access (CAS) and Digital Rights Management (DRM), for a wide range of platforms, such as DVB, IPTV, and OTT.
